WORKSHOP ON CAPTURE-RECAPTURE ANALYSES

Mallorca, Spain

27 Nov. - 1 Dec. 2023

20 places - 380€

This introductory course aims to introduce **students, researchers and environmental managers** to the theory and practical aspects of the analysis of capture-mark-recapture and – recovery data to estimate survival, recruitment and dispersal probabilities. The course is based on theoretical classes as well as practical sessions with real and simulated data.

The format of the course will be a combination of lectures and computer lab exercises with programs MARK, U-CARE and R (optional).

No previous knowledge of these programs is needed.

Deadline for registration 15th of October 2023.

Please, send a message to g.tavecchia@uib.es

If you are student or currently unemployed and wish to be considered for a scholarship, please indicate so when applying.
